Healthcare was the #1 issue identified in Utah Foundation's statewide survey of voters. It was 4th on the top ten list in 2012, but current political debates and the implementation of the Affordable Care Act have helped to push it to the top of the list in 2016. In this edition of Utah Thrives, we'll hear from some top thought leaders in the healthcare field, including Dr. Vivian Lee, Senior Vice-President for Health Sciences at the University of Utah, Greg Poulsen, Senior Vice-President and Chief Strategy Officer for Intermountain Healthcare and Jason Stevenson with the Utah Health Policy Project.
