

# The Republicans in Congress aren't giving up on repealing the ACA.

In fact, they're drafting a bill that's even **worse than their first attempt.**

## The new ACA repeal bill would:

-  Let insurers discriminate against anyone with pre-existing health conditions—from cancer to a difficult pregnancy to back pain
-  Give insurers the power to read your doctor's notes & medical records
-  Remove the guarantee that insurance plans cover benefits like hospitalization, mental health, prescription drugs, and maternity care
-  Bring back lifetime and annual caps on insurance benefits for both employer-based coverage and the individual market
-  Make it much more risky to transition from employer-based coverage to the individual market if you lose or quit your job or retire

## These new attacks on popular consumer protections are on top of the original bill's laundry list of terrible ideas that will...

-  Make 52 million Americans uninsured by 2026 – resulting in a doubling of Utah's uninsured rate
-  Reduce financial assistance for tens of thousands of Utah families by replacing income-based subsidies with age-limited tax credits
-  Raise doctor co-pays and deductibles for 72% of Utahns enrolled in marketplace insurance by eliminating cost-sharing assistance
-  Spike insurance premiums by 20-30% for older Utahns [age 40+]
-  Cut Medicaid funding by \$882 billion—leading to devastating cuts
-  Repeal \$1 trillion in taxes (over 10 years) on high-income earners, drug-makers, insurers, device makers, and executive salaries

**Tell your member of Congress to stop playing games with your healthcare at the risk your health and financial security.**
